

M.G. 'Y' series Guarantee Plate Issue Ledger.

By Neil Cairns

neil.cairns@virgin.net

There are no records of MG 'Y' series held by Austin Rover, Rover, BMHIT, or M.G. They were either lost, or destroyed in the late 1950's, so writing to BMHIT to get a certificate is a lost cause. It is the only Nuffield/BMC model where *all* those built are affected. However, there is the Ledger of the cars as they left the factory and this is held by John Lawson, of the 'Y' Register. John is the author the book 'M.G. 'Y' Type Saloons and Tourers', ISBN 0 947981 31 4, which is now sadly out of print. Second hand copies come to light from time to time and wherever possible these are purchased by the MG Car Club Y Type Register and are available from the MGCC regalia secretary, David Hague. A copy of the order form is available on the worldwide web at www.mgcars.org under Regalia, or from me. The ledger is not a complete list either, as there are gaps and many 'YA's are missing.

Interesting to see that compared to today where thousands of cars are built on each shift on a production line, M.G. turned out between 0 and 31 Y's per day, (i.e. 20/11/52). Total production figures for the 'YA' were 6,158; for the 'YT' 877; and for the 'YB' 1,301. Production by year was:-

'YA'

1947	Y/0251 - Y/1150	900
1948	Y/1151 - Y/2208	1,058
1949	Y/2209 - Y/4239	2,031
1950	Y/4240 - Y/6284	2,045
1951	Y/6285 - Y/7285	1,001

(note that YT's were part of the YA numbering sequence.)

'YB'

1951	YB/0251 - YB/0306	56
1952	YB/0307 - YB/0929	623
1953	YB/0930 - YB/1551	622

Total production of all versions was **8,336**. (In comparison the Wolseley 4/44, made from 1952-1956, using the SC2 engine, there were 31,000.)

The Ledger data only has the cars chassis number, the engine number and the date it left the factory. The 'Y's built between 1947 and 1951 carries a prefix of 'Y'. This model was later called the 'YA' once the next series was in production, the 1952-1953 'YB'. The YB has a prefix of 'YB'. The open model, the 'YT' 'tourer, 1948-1950, has 'YT' as a prefix. 'Y' chassis numbers were prefixed with more information. See the following list using the 'YT' for an explanation of this prefix:-

'Y'	YA
'YB'	YB
'YT'	YT tourer, rhd for home UK
'YT/EXL'	lhd for export, speedometer in KPH

'YT/EXR' rhd for export, speedometer in MPH
 'YT/EXR/K' rhd for export, speedometer in KPH
 'YT/EXL/M' lhd for export, speedometer in MPH
 'YT/EX/U' lhd for USA, speedometer in MPH

The original engine fitted to the 'YA' is prefixed XPAG/SC, the SC standing for single carburetter. That fitted to late YA's and all YB's was prefixed XPAG/SC2. This SC2 engine has a bigger clutch of 8" diameter, not the 7.25" one. The left hand drive YT has an engine prefix of XPAG/TL, (tourer, lhd.) The right hand drive YT has XPAG/TR (tourer, rhd.) More detail can be found in Anders Clausagers book, 'M.G. Saloon Cars', ISBN 1 901432 06 8, also available from the MG Car Club Y Type Register.

The chassis number is stamped on the brass plate on the battery box, and repeated on the outer left-hand chassis member. This is a bolt on extension, that holds on the bumper. Do not confuse the Nuffield Body Number with the chassis number.

Should you need more detail on M.G. engines, and help in identifying them, "M.G. Engines, 1935-1998", is available free to download on (84 pages of A4,) www.mgcars.org.uk/engine/mgengine_history.rtf. I am on neil.cairns@virgin.net Occasionally I have hard copies complete with pictures. The file is just text, no pictures. (M.G. Post War Saloons is soon to follow.)

The YB Ledger Records. (As built, *not* a current list, contact the MGCC for that.)

Chassis Number	Engine Number	Completion Date
