

Windsor-Detroit MG Club

A Topping Tech Session

Back in September of 2003, Don Capoferi kindly offered to run a Tech Session; fitting a top to Gene Johnson's MGB-LE. It was well attended and much praised, even though everything did not go quite as planned. Unfortunately, Gene's car's fuel pump decided to be uncooperative and he arrived late. Then, during fitting, a poorly sown seam came apart and it was not possible to proceed further. Instead, Don turned his attention to re-fitting a badly installed top on Rick Astley's car.

Gene exchanged the faulty top but never did get it fitted, so Don will install it during a new Tech Session this month. There were at least 3 versions of MGB tops during the production life of the car, and although Don will demonstrate on Gene's 1980, everyone with any age or model MG, or indeed British sports car, will find something to take away from this session.

The Tech-Session will take place at Don Capoferi's home:

Sunday May 21

9:30 am (but try to be there by 9:00)

**2412 St. Joseph St., West Bloomfield, Michigan.
(248-738-9218).**

For those unfamiliar with the region, Square Lake is at about 18 mile and Middlebelt is 3 miles west of Telegraph. From Middlebelt Road, turn left onto Square Lake and 1st right onto St Joseph Street. Don's house is the 5th on the left, just after Littletel Avenue.

This event is weather dependent

Don needs to have some sun heating to make the top supple and the anticipated attendance will mean that there is no room to work in the garage. Please call Rick Astley's cell phone at 248-760-7531 after 4:00 pm, May 20th when weather forecasts should be accurate enough to give us a go or no-go decision.
