

## Gear lever gaiter - cone piece

Material - leathercloth - colour to suit main upholstery

1. Stitch side A to side B to form a cone
2. Stitch around C to base piece.
3. Stitching should be approximately 0.1 inch from inside of edge A, B and C. Stitching of A and B should be on the INSIDE of the cone so material will need to be INSIDE OUT for this seam.

NB. This is NOT a template, but a measured drawing. Do not use this to draw around but rather as an indication for measurements. Picture for illustration purposes only.
